Zeel Kheni

SENIOR UNITY DEVELOPER

Profile

Unity Developer with 6+ years of professional experience and 10+ shipped mobile titles across iOS and Android. Strong in Unity/C#, 3D content integration, materials, shaders, animation, physics, Asset Bundles, Addressables, and real-time performance optimization.

Experienced with CPU/GPU/memory profiling, draw call optimization, CI/CD, live-ops, debugging, and cross-functional work with artists, designers, QA, and engineers. Focused on reliable, production-ready Unity content and workflows.

Education

B.E. Information Technology
Gujarat Technological University
2022

Diploma, Information Technology
Gujarat Technological University
2019

Skills

PROFESSIONAL

- Technical Ownership
- Mentorship
- Code Reviews
- Cross-Functional Collaboration
- Problem Solving
- Production Support
- Performance Mindset
- Team Communication
- Feature Ownership
- Remote Collaboration

TECHNICAL

- Unity & C#
- 3D Content Integration
- Unity URP
- Shaders & Materials
- Asset Bundles / Addressables
- CPU/GPU/Memory Profiling
- Git & CI/CD
- REST APIs
- Firebase / PlayFab
- Multiplayer Networking

Achievements

10+ Shipped Games
iOS & Android
2020 - Present

Work Experience

Lead Game Engineer & Technical Consultant | Freelance, Remote Dec 2025 - Present

- Architect and implement Unity/C# features and production systems with focus on reliable content integration, maintainability, and performance.
- Work closely with designers, artists, product managers, QA, and developers to turn creative requirements into shippable Unity implementations.
- Optimize assets, materials, shaders, CPU/GPU usage, memory, and battery behavior across mobile targets.
- Work with Asset Bundles, Addressables, backend services, live-ops, analytics, and CI/CD workflows.
- Debug production issues across devices and support testing, builds, releases, and ongoing content updates.
- Mentor junior and mid-level developers through code reviews and technical guidance.

Senior Game Developer | Noborder.z Innovations, Indore, India Jun 2024 - Dec 2025

- Designed and implemented complex Unity gameplay and 3D systems using C# and scalable object-oriented architecture.
- Collaborated with design and art teams to integrate 3D assets, gameplay content, animation, physics, and UI.
- Profiled and optimized CPU, GPU, memory, and runtime performance for mobile targets.
- Debugged production issues and supported feature quality and release readiness across devices.

Senior Game Developer | Technomancy Private Limited, Indore, India Oct 2022 - Jun 2024

- Implemented gameplay, UI, animation, multiplayer, live-ops, analytics, remote configuration, and data-driven features in Unity.
- Worked on shaders, graphics optimization, draw calls, and profiling to improve runtime performance.
- Integrated backend services and content workflows using Firebase, PlayFab, APIs, Asset Bundles, and Addressables.
- Contributed to architecture, code reviews, mentoring, Git, CI/CD, and automated build workflows.

Game Developer | InfoOyster Technologies, Bhavnagar, India Mar 2021 - Oct 2022

- Built Unity gameplay and multiplayer features and optimized client performance for mobile production builds.
- Profiled and debugged runtime and gameplay issues.
- Implemented gameplay mechanics, physics, animation, and C# systems for mobile games.
- Optimized code and asset memory usage and worked with QA to identify and resolve defects.

Mobile Game Developer | Freelance, Surat, India May 2020 - Mar 2021

- Developed gameplay mechanics, levels, physics, animation, and core systems for shipped mobile games.
- Handled implementation, debugging, optimization, asset integration, and delivery across mobile projects.

Shipped Mobile Games

10+ shipped titles: Wild Waker, HexGlow, IQ-Ball, Difference Journey, Haste Runner, XANA Metaverse, Run For Money, Stardust Metaverse, Snap Orbit.
